

## DC24V Fm200 Gas Suppression System 40L 70L 90L 100L 120L

### Basic Information

- Place of Origin: Guangzhou, GuangDong, China
- Brand Name: RUIGANG
- Certification: CCC/ISO9001/ISO14001/ISO10012/ISO45001
- Model Number: GQQ40/2.5RG
- Minimum Order Quantity: 1set system
- Price: \$550
- Packaging Details: Plywood outer box with bubble bag or paper
- Delivery Time: 15~20 days
- Supply Ability: 30000 sets per month

### Product Specification

- Working Temperature: 10°C~+50°C
- Working Pressure: 2.5MPa
- Application: Electrical Equipment/Server Room/Control Room
- Product Type: Fire Extinguishing System
- Cylinder Volume: 40L
- Extinguishing Agent Capacity: 40kg
- System Power Supply: AC 220V DC 24V 1A
- Fire Extinguishing Time: 10 Seconds
- Installation: Easy To Install
- Zone Management: Single
- Power: DC24V/1.6A
- Product Name: FM200 Cabinet Fire Extinguishing Equipment
- Actuation: Automatic Or Manual Start

## Product Description

### FM200 Cabinet Fire Extinguishing System Easy Installation for Fire Protection in Industrial Needs

#### Product Description:

The FM200 Cabinet Fire Extinguishing System is pre-engineered with the cylinder, discharge hose, storage cabinet and other actuating components. It doesn't require distribution piping, so no agent, time or cost waste. It also enjoys the advantages of less space demand, easier installation, and lower construction expenses.

The FM200 Cabinet Fire Extinguishing System comes with a pre-engineered and pre-assembled cabinet that contains the FM200 gas cylinders, release mechanism and control panel. The system is designed to detect fires at an early stage by using either a heat detector or a smoke detector. When a fire is detected, the FM200 gas is released into the cabinet, extinguishing the fire within seconds.

The FM200 Cabinet Fire Extinguishing System is an advanced and safe fire protection solution that is suitable for various commercial and industrial settings. Its main application is to protect valuable equipment and assets from fire hazards, ensuring the safety and continuity of operations.

#### Place of application:

Data Centers and Server Rooms

Data centers and server rooms are critical to the operation of businesses, housing sensitive and valuable information. In the event of a fire, The FM200 Cabinet Fire Extinguishing System can quickly suppress the fire without causing any damage to the equipment, ensuring minimal downtime and data loss.

Telecommunication Facilities

Telecommunication facilities, such as telecommunication rooms and exchanges, are essential for communication and information transmission. The FM200 Cabinet Fire Extinguishing System is an ideal solution for these facilities as it can quickly extinguish fires without damaging the sensitive equipment and infrastructure.

Industrial Plants and Warehouses

Industrial plants and warehouses often store flammable materials and equipment, making them prone to fire hazards. The FM200 Cabinet Fire Extinguishing System can effectively suppress fires in these environments, protecting both the workers and the assets from harm.

## Museums and Art Galleries

Museums and art galleries house valuable and irreplaceable artifacts and artworks. The FM200 Cabinet Fire Extinguishing System is a safe and reliable solution for these settings, as it can extinguish fires without causing any harm to the delicate and valuable items.

### Technical Parameters:

Specification					
Working pressure	Working temperature	Working voltage	Capacity	Discharge time	Protected volume
2.5 MPa	0~50°C	DC24V	40,70,90,100 120,150,180 L	≤10S	63 473 m³

### Packing and Shipping:

The FM200 Cabinet Fire Extinguishing System is carefully packaged to ensure safe and secure delivery to our customers. We understand the importance of protecting your investment and take all necessary precautions to prevent any damage during shipping.

#### Packaging

The FM200 Cabinet Fire Extinguishing System is packaged in a sturdy wooden crate to provide maximum protection during transportation. The crate is sealed and reinforced with straps to prevent any movement or shifting during transit. Each component of the system is individually wrapped in bubble wrap and placed in the crate to further prevent any damage.

#### Shipping

We offer worldwide shipping for the FM200 Cabinet Fire Extinguishing System. Our team carefully coordinates with trusted shipping companies to ensure timely and safe delivery to our customers. The system is shipped via air or sea, depending on the customer's location and preference.

Upon shipment, customers will receive a tracking number to monitor the status of their order.

For international shipments, we take care of all necessary customs and import procedures to make the process as seamless as possible for our customers.

#### Final Inspection

Before shipping, each FM200 Cabinet Fire Extinguishing System undergoes a final inspection to ensure that it meets our high quality standards. This includes checking for any defects or damages and ensuring that all components are included in the package.

Our team takes pride in delivering top-quality products and we strive to make the packaging and shipping process as efficient and worry-free as possible for our customers.
