

434 Square Meters Clean Agent Fire Suppression System Fm200 Spray Time 10 Seconds

Our Product Introduction

for more products please visit us on firefm200.com

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: RUIGANG
- Certification: CCC/ISO9001/ISO45001/ISO14001/ISO10012
- Model Number: GQQ120*2/2.5RG
- Minimum Order Quantity: 1 set
- Price: negotiation
- Packaging Details: We pack products with first polyfoam and then the wooden cases. Once products are too big or customers require a pallet for products, we will make products a pallet.
- Delivery Time: 10~15 working days
- Payment Terms: L/C, D/P, T/T, Western Union, Paypal, Credit card
- Supply Ability: 30000 sets / month

Product Specification

- Electrical Requirements: 220V, 50Hz
- Zone Management: Single
- Max Working Pressure: 4.2MPa
- Working Pressure: 2.5MPa
- Spray Time: 10 Seconds
- Maximum Protective Volume: 434 Square Meters
- Fire Protection Level/Pattern Of Extinguishing: Enclosed Flooding
- Cabinet Size: 950*450*1850mm
- Number Of Cylinder Groups: 2
- Highlight: 434 square meters clean agent fire suppression

Because we are dedicated,
we are professional.

Product Description

FM200 Cabinet Fire Extinguishing System Customizable for Your Industrial Needs

Product Description:

The HFC-227ea gas fire extinguishing device, also known as the sevofluoropropane device without a pipe network, is a type of fire extinguishing equipment that uses full flooding, independent complete set, and mobility as its means of presetting. It has unique features such as easy installation, attractive appearance, no loss of fire extinguishing agent through pipe networks, high fire extinguishing efficiency, and fast speed.

On the other hand, the cabinet type HFC-7ea fire extinguishing device is a prefabricated, fully submerged fire extinguishing equipment that is complete and independent in its setup. This type of fire extinguishing equipment can be connected to the fire control center and can be driven by the fire alarm and fire extinguishing controller to implement automatic fire extinguishing. Moreover, the device doesn't need any special equipment room since the whole set of fire extinguishing equipment are in the protection area.

Applications:

Scope of Application:

The following facilities and areas are suitable for implementation:

Computer rooms
Expensive medical facilities
Data processing centers
Expensive industrial facilities
Telecommunications facilities
Libraries
Process control centers
Museums and art galleries
Emergency power facilities
Clean rooms
Flammable liquid storage areas
Anechoic rooms

The aforementioned facilities and areas require particular attention to detail when it comes to implementing various procedures. It is essential to ensure that the procedures adopted take into account the specific needs and requirements of the environment. Additionally, it is equally important to adhere to the safety regulations related to the facility to avoid any accidents or hazardous situations that may arise. In conclusion, the scope of application is vast and covers a diverse range of environments. However, the underlying principle is the same that is to implement the appropriate procedures while at the same time ensuring the safety of the facility.

Support and Services:

The FM200 Cabinet Fire Extinguishing System is designed to provide quick and effective fire suppression in small enclosures such as electrical cabinets, server rooms, and other critical infrastructure. The system utilizes FM200 gas, a clean agent that leaves no residue and is safe for use in occupied spaces. It is ideal for protecting valuable equipment and data, and can be customized to meet specific application requirements.

Our technical support team is available to assist with any questions or concerns regarding installation, operation, and maintenance of the FM200 Cabinet Fire Extinguishing System. Additionally, we offer a range of services to ensure the system is functioning properly and in compliance with relevant codes and standards.

Our team of experts has extensive experience working with the FM200 Cabinet Fire Extinguishing System and can provide customized solutions to meet the unique needs of each customer. Contact us to learn more about how we can support your fire protection needs.

Packing and Shipping:

Product Packaging:

FM200 Cabinet Fire Extinguishing System

Instruction manual

Mounting hardware

Shipping:

Product will be shipped within 10-15 business days of purchase

Shipping method: Standard ground shipping

Shipping cost: Calculated based on destination

Tracking information will be provided via email

FAQ:

Q1: What is the brand name of this fire extinguishing system?

A1: The brand name of this fire extinguishing system is RUIGANG.

Q2: What is the model number of this fire extinguishing system?

A2: The model number of this fire extinguishing system is GQQ120*2/2.5RG.

Q3: Where is this fire extinguishing system manufactured?

A3: This fire extinguishing system is manufactured in Guangzhou, Guangdong, China.

Q4: What certifications does this fire extinguishing system have?

A4: This fire extinguishing system has CCC, ISO9001, ISO45001, ISO14001, and ISO10012 certifications.

Q5: What is the minimum order quantity for this fire extinguishing system?

A5: The minimum order quantity for this fire extinguishing system is 1 set.
