

2.5MPa Fm 200 Fire Extinguishing System Cabinet Capacity 90kg*2

Our Product Introduction

for more products please visit us on firefm200.com

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: RUIGANG
- Certification: CCC/ISO9001/ISO45001/ISO14001/ISO10012
- Model Number: GQQ90*2/2.5RG
- Minimum Order Quantity: 1 set
- Price: negotiation
- Packaging Details: We pack products with first polyfoam and then the wooden cases. Once products are too big or customers require a pallet for products, we will make products a pallet.
- Delivery Time: 10~15 working days
- Payment Terms: L/C, D/P, T/T, Western Union, Paypal, Credit card
- Supply Ability: 30000 sets / month

Product Specification

- Fire Protection Level/Pattern Of Extinguishing: Enclosed Flooding
- Zone Management: Single
- Activation Method: Manual/Automatic
- Power: DC24V/1.6A
- Maximum Protective Volume: 326 Square Meters
- Cabinet Color: Red
- Extinguishing Agent: FM200
- Cabinet Capacity: 90kg*2
- Dimension Of Cabinet: 950*450*1600mm
- Working Pressure: 2.5MPa
- Highlight: 2.5MPa fm 200 fire extinguishing system

Because we are dedicated,
we are professional.

Product Description

Enclosed Flooding FM200 Fire Extinguishing Cabinet Red Color 544m² Dual 150kg Capacity DC24V

Product Description:

The sevofluoropropane gas fire extinguishing device, also known as the sevofluoropropane device without pipe network, is a type of fire extinguishing equipment that is designed to be fully flooded, independent and mobile. This equipment is easy to install due to its light weight and has a beautiful appearance. Moreover, it does not require the installation of a pipe network, making it more efficient in extinguishing fires quickly.

The cabinet type HFC-227ea fire extinguishing device is a prefabricated, fully submerged fire extinguishing equipment that is also an independent complete set of fire extinguishing equipment. In addition, it has the ability to connect with the fire control center to be driven by the fire alarm and fire extinguishing controller, thus allowing for automatic fire extinguishing. The device does not need a special equipment room and the entire set of fire extinguishing equipment is in the protection area to ensure maximum safety.

With the sevofluoropropane and HFC-227ea devices, fire safety and prevention have become more efficient and reliable. These fire extinguishing equipment will not only help extinguish fires quickly but also provide peace of mind for individuals and businesses alike.

Applications:

Scope of application:

The following venues and facilities are suitable for this product:

Computer rooms
Expensive medical facilities
Data processing centers
Expensive industrial facilities
Telecommunications facilities
Libraries
Process control centers
Museums and art galleries
Emergency power facilities
Clean rooms
Flammable liquid storage areas
Anechoic rooms

This product is designed to meet the needs of a wide range of industries and facilities. It is especially suited to environments where expensive or delicate equipment needs to be protected from power surges or fluctuations. The product is also an ideal choice for facilities that require clean, stable power for critical operations, such as medical facilities and data centers. Additionally, the product is suited to use in emergency power facilities, where the stability and reliability of the power source is critical to ensuring power is available when it is needed most.

Support and Services:

The FM200 Cabinet Fire Extinguishing System is a reliable and efficient solution for protecting valuable equipment and electronics from fire damage. Our product technical support and services include:

24/7 emergency support
Training and education on the use of the system
Customized solutions to meet your specific needs

Our team of experienced technicians and engineers are dedicated to ensuring that your FM200 Cabinet Fire Extinguishing System is functioning at its best at all times. Contact us for more information on how we can help protect your valuable assets.

Packing and Shipping:

Product Packaging:
FM200 Cabinet Fire Extinguishing System
Instruction Manual
Mounting Brackets and Hardware
Shipping:
Shipping Method: Ground

FAQ:

Here are the frequently asked questions and answers for the RUIGANG FM200 Cabinet Fire Extinguishing System:

Q: What is the model number of this fire extinguishing system?

A: The model number for this fire extinguishing system is GQQ90*2/2.5RG.

Q: Where is this fire extinguishing system manufactured?

A: This fire extinguishing system is manufactured in Guangzhou, Guangdong, China.

Q: What certifications does this fire extinguishing system have?

A: This fire extinguishing system has CCC, ISO9001, ISO45001, ISO14001, and ISO10012 certifications.

Q: What is the minimum order quantity for this fire extinguishing system?

A: The minimum order quantity for this fire extinguishing system is 1 set.

Q: What is the delivery time for this fire extinguishing system?

A: The delivery time for this fire extinguishing system is 10~15 working days.

Q: What are the available payment terms for this fire extinguishing system?

A: The available payment terms for this fire extinguishing system are L/C, D/P, T/T, Western Union, Paypal, and Credit card.

Q: What is the supply ability for this fire extinguishing system?

A: The supply ability for this fire extinguishing system is 30000 sets per month.

Q: How is this fire extinguishing system packaged?

A: We pack this fire extinguishing system with first polyfoam and then wooden cases. If the product is too big or customers require a pallet for products, we will make products a pallet.

Q: What is the price for this fire extinguishing system?

A: The price for this fire extinguishing system is negotiable.
