

## 30x3kW High Pressure Mist Fire Suppression System 336L/Min

Our Product Introduction

for more products please visit us on [firefm200.com](http://firefm200.com)

### Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: RUIGANG
- Certification: CCC/ISO/CMA/CAL/CNAS
- Model Number: XSWBG336/14-RG
- Minimum Order Quantity: 1 set
- Price: negotiation
- Packaging Details: Plywood outer box with bubble bag or paper
- Delivery Time: 10~15 working days
- Payment Terms: L/C, D/P, T/T, Western Union, Paypal, Credit card
- Supply Ability: 300sets per month

Because we are dedicated,  
so we are professional.

### Product Specification

- Activation Method: Automatic Or Manual
- Model: XSWBG336/14-RG
- Application: Fire Suppression
- Rated Flow: 336L/min
- Pump Type: High-pressure Pump
- Nozzle Type: Mist Nozzle
- Power: 30x3 (KW)
- Jockey Pumps (PC): 2
- Size: 2900mm\*1100mm\*2000mm
- Rated Pressure: 14MPa
- Water Pumps: 3+1(standby)
- Highlight: 30x3kW Water Mist Fire Fighting System,  
Water Mist Fire Fighting System 336L/Min,

## Product Description

### High pressure Water Mist System with Automatic Activation - 336 L/min Flow Rate

#### Product Description:

The High-pressure water mist system can be activated both manually and automatically, giving you the flexibility to choose the best method for your situation. Whether you prefer the ease of automatic activation or the control of manual activation, this system has you covered.

This water mist system is specifically designed for fire suppression applications. It uses a high-pressure pump to generate a fine mist of water that quickly extinguishes the flames. The fine mist also helps to cool the surrounding area, reducing the risk of the fire reigniting. Additionally, the water mist system is safe to use on a variety of surfaces, including electrical equipment.

When it comes to fire suppression, speed is key. The High-pressure water mist system is designed to quickly and effectively extinguish fires, helping to minimize damage and save lives. The high-pressure pump ensures that the water mist is delivered with enough force to quickly saturate the area and extinguish the flames.

The High-pressure water mist system is a type of water mist system that uses a high-pressure pump to generate the mist. This type of system is ideal for fire suppression applications where speed and effectiveness are of the utmost importance. The high-pressure pump ensures that the water mist is delivered with enough force to quickly extinguish the flames and prevent them from spreading.

Overall, the High-pressure water mist system is the ultimate solution for fire suppression. With its high-pressure pump, automatic and manual activation options, and effective water mist delivery system, this product is sure to exceed your expectations. Whether you are looking to protect your home, business, or industrial facility, the High-pressure water mist system is the perfect choice.

#### Features:

Product Name: High-pressure water mist system

Type: Water Mist System

Rated Flow: 336 L/min

Rated Pressure: 14MPa

Nozzle Material: Stainless Steel

Jockey pumps (PC): 2

#### Technical Parameters:

Attribute	Value
Jockey pumps (PC)	2
Pump Type	High-pressure Pump
Activation Method	Automatic Or Manual
Nozzle Type	Mist Nozzle
Pump Material	Stainless Steel
Model	XSWBG336/14-RG
Type	High-pressure water mist system
Application	Fire Suppression
Rated Pressure	14MPa
Power	30x3 (KW)

#### Applications:

The High-pressure water mist system uses mist nozzles to deliver a fine mist of water at high pressure, which is ideal for suppressing fires quickly and effectively. With its two jockey pumps and high-pressure pump, this system is capable of delivering water at an impressive rate, making it an ideal choice for large-scale fire suppression scenarios.

The RUIGANG High-pressure water mist system is perfect for a variety of application occasions and scenarios. It is suitable for use in factories, warehouses, hospitals, hotels, and other commercial buildings where fire suppression is essential. This system can be used to protect valuable equipment, prevent damage to property, and most importantly, save lives in the event of a fire.

When it comes to product packaging, the RUIGANG High-pressure water mist system comes in a plywood outer box with bubble bag or paper, ensuring that it is well-protected during shipping. Delivery time typically takes 10-15 working days, and payment terms include L/C, D/P, T/T, Western Union, Paypal, and Credit card.

With a supply ability of 300 sets per month, the RUIGANG High-pressure water mist system is an excellent choice for those looking for a reliable and effective fire suppression system. Whether you are looking to protect a small warehouse or a large commercial building, the RUIGANG High-pressure water mist system is sure to meet your needs.

## Packing and Shipping:

### Product Packaging:

High-pressure water mist system device

Water tank (if applicable)

Mounting brackets and screws

User manual and installation guide

### Shipping:

Shipping method: Land carriage

Shipping time: 10-15 business days

Tracking information will be provided via email once the item has shipped.
