

Automatic Single Zone Cabinet Fire Extinguishing System / Fire Extinguishing System

Our Product Introduction

for more products please visit us on firefm200.com

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: RUIGANG
- Certification: CCC/ISO9001/ISO45001/ISO14001/ISO10012
- Model Number: GQQ40/2.5RG GQQ70/2.5RG
GQQ90/2.5RG GQQ100/2.5RG
GQQ120/2.5RG GQQ150/2.5RG
GQQ180/2.5RG
- Minimum Order Quantity: 1 set
- Price: negotiation
- Packaging Details: We pack products with first polyfoam and then the wooden cases. Once products are too big or customers require a pallet for products, we will make products a pallet.
- Delivery Time: 10~15 working days
- Payment Terms: L/C, T/T,
- Supply Ability: 30000 sets / month

Because we are dedicated,
so we are professional.

Product Specification

- Zone Management: Single
- Spray Time: 10 Seconds
- Extinguishing Agent: FM200
- Discharge Pressure: 5.6±0.28MPa
- Fire Protection Level: Pattern Of Extinguishing
- Alarm System: Excluded
- Cabinet Capacity: 40kg~180kg
- Working Temperature: 0°C ~ 50°C
- Working Pressure: 2.5Mpa
- Cylinder Color: Red
- Filling Density: 1120kg/m3
- Highlight: Automatic Cabinet Fire Extinguishing System,
Single Zone Cabinet Fire Extinguishing System

Product Description

Product Description:

One of the main features of this system is its discharge pressure of $5.6 \pm 0.28 \text{ MPa}$. This high pressure ensures that the FM200 gas is quickly dispersed throughout the protected area, suppressing the fire within seconds. The system has a spray time of 10 seconds, which is more than enough time to put out a fire before it causes significant damage.

The cabinet of the FM200 Automatic Fire Extinguishing System is made of steel, which is a durable and long-lasting material. The cabinet is designed to withstand harsh environments and is painted red, making it easy to locate in an emergency.

The FM200 Cabinet Fire Extinguishing System is powered by a DC24V/1.6A power supply, which is reliable and efficient. The system is easy to install and can be connected to a building's fire alarm system for automatic activation in the event of a fire.

As a pollution-free and safe-to-use fire suppression agent, FM200 is an ideal choice for protecting valuable assets. This system is an essential piece of firefighters equipment and is widely used in commercial and industrial settings. The FM200 Automatic Fire Extinguishing System is designed to suppress fires quickly and effectively, minimizing damage and downtime.

Applications:

These cabinet fire extinguishing systems are designed to provide reliable and efficient fire protection for a variety of applications. They are ideal for use in server rooms, data centers, control rooms, archives, museums, and other locations that contain valuable assets and sensitive equipment. The FM200 extinguishing agent is effective in suppressing fires quickly and without leaving residue, ensuring that your equipment and assets are protected.

RUIGANG's FM200 Cabinet Fire Extinguishing System is easy to install and operate, making it a convenient solution for fire protection. The system is designed to be installed inside a cabinet or enclosure, providing localized fire protection. The extinguishing agent is released automatically when the system detects a fire, ensuring that the fire is suppressed quickly and effectively.

These cabinet fire extinguishing systems are certified by CCC, ISO9001, ISO45001, ISO14001, and ISO10012, ensuring that they meet the highest standards of quality and safety. They are also available at a competitive price, with a minimum order quantity of just one set. RUIGANG is capable of supplying up to 30000 sets per month, making it a reliable source for fire protection equipment.

The FM200 Cabinet Fire Extinguishing System is designed to work in a wide range of temperatures, from 0°C to 50°C , and has a maximum working pressure of 4.2 MPa . The systems are packaged with first polyfoam and then wooden cases, ensuring that they are protected during shipping. For larger systems, RUIGANG can provide pallets for added protection during shipping.

If you are looking for a reliable and efficient fire protection solution for your valuable assets and sensitive equipment, consider RUIGANG's FM200 Cabinet Fire Extinguishing System. With easy installation, competitive pricing, and reliable performance, this system is an excellent choice for any organization that values fire safety.

Support and Services:

The FM200 Cabinet Fire Extinguishing System product comes with complete technical support and services to ensure proper installation, operation, and maintenance of the system. Our team of experts is available to provide on-site assistance for installation and commissioning of the system, as well as training for personnel on proper usage and handling of the system. Additionally, we offer regular maintenance and inspection services to ensure the system is always in optimal working condition and ready to respond in case of a fire emergency.

Packing and Shipping:

Product Packaging:

The FM200 Cabinet Fire Extinguishing System is packaged in a sturdy cardboard box with foam inserts to protect the contents during transport. The box includes the FM200 cylinder, discharge nozzle, control head, and all necessary mounting hardware. The package also includes an installation manual and a user guide.

Shipping: ocean shipping

Upon purchase, the FM200 Cabinet Fire Extinguishing System will be shipped via a reliable and trusted courier service to ensure timely and safe delivery. The package will be tracked and requires a signature upon delivery. Shipping costs may vary depending on the destination and chosen delivery method.
