

Automatic FM 200 Enclosed Flooding Piping Extinguishing System

Our Product Introduction

for more products please visit us on firefm200.com

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: RUIGANG
- Certification: CE/CCC/ISO/CMA/CAL/CNAS
- Model Number: QMQ4.2/70N-RG
- Minimum Order Quantity: 1 set
- Price: negotiation
- Packaging Details: We pack products with first polyfoam and then the wooden cases. Once products are too big or customers require a pallet for products, we will make products a pallet.
- Delivery Time: 10~15 working days
- Payment Terms: L/C, T/T
- Supply Ability: 3000 sets per week

Because we are dedicated,
so we are professional.

Product Specification

- Activation Method: Automatic
- Power: DC24V/1.5A
- Extinguishing Concentration: 8~10%
- Pattern Of Extinguishing: Enclosed Flooding
- Nozzle Discharge Time: 10 Seconds
- Agent: FM 200
- Working Pressure: 4.2MPa
- Cylinder Material: Steel
- Highlight: **Automatic FM 200 Piping Extinguishing System,
Enclosed Flooding Piping Extinguishing
System**

Product Description

Product Description:

The FM200 Piping Extinguishing System has a nozzle discharge time of 10 seconds, which means that it can quickly and effectively extinguish a fire before it has a chance to spread. This fast-acting system can help to minimize damage and reduce the risk of injury or loss of life in the event of a fire.

This system has a cylinder volume of 70L and is designed to be activated automatically in the event of a fire. In addition to its automatic activation mode, it also has an electrical manual starting mode and a mechanical emergency manual starting mode, which ensures that the system can be activated quickly and easily in any situation.

FM200 Piping Extinguishing System uses FM200 gas, which is a colorless, odorless, and non-conductive gas that is safe for humans and equipment. This gas is highly effective at extinguishing fires and can quickly suppress flames by removing heat from the fire and reducing oxygen levels in the air.

In conclusion, FM200 Piping Extinguishing System is a reliable and effective fire suppression system that provides fire safety solutions for a wide range of settings. Its fast-acting nozzle discharge time, automatic activation method, and multiple starting modes make it a versatile and essential tool for protecting valuable assets and ensuring the safety of personnel. Whether you need to protect a data center, museum, archive, or any other location, the FM200 Piping Extinguishing System is an excellent choice for your fire suppression needs.

Applications:

Computer rooms and data centers
Telecommunication facilities
Museums and art galleries
Hospitals and medical facilities
Industrial and manufacturing plants
Oil and gas facilities

The system is made from high-quality steel piping material and can withstand a maximum working pressure of 5.3MPa. The activation method is automatic, making it easy to use and operate, and the working pressure is 4.2MPa. The FM 200 agent used in the system is HFC-227ea, a clean and non-toxic gas that is safe for humans and the environment.

In terms of certifications, the QMQ4.2/70N-RG system has been awarded CE, CCC, ISO, CMA, CAL, and CNAS certifications, ensuring that it meets international quality and safety standards. The minimum order quantity is one set, and pricing is negotiable. Packaging is done with first polyfoam and then wooden cases, and in the case of products being too big or requiring a pallet, pallets will be provided. Delivery time is 10-15 working days, and payment terms include L/C and T/T. Additionally, the system has a supply ability of 3000 sets per week, making it an easily accessible and convenient option for those in need of a reliable FM200 fire fighting solution.

Support and Services:

The FM 200 Piping Extinguishing System is a highly efficient fire suppression system designed for use in a variety of settings, including commercial, industrial, and residential environments. Our technical support and services team is dedicated to ensuring that our customers receive the highest level of support and service possible.

Our team is available to answer any technical questions you may have about the FM 200 Piping Extinguishing System, including installation, operation, and maintenance. We also offer a range of services to help you get the most out of your system, including system design and engineering, installation support, and training for your maintenance staff.

Our goal is to make sure that your FM 200 Piping Extinguishing System is always working at peak efficiency, so that you can have peace of mind knowing that you are protected in the event of a fire. Contact us today to learn more about how our technical support and services can help you get the most out of your FM 200 Piping Extinguishing System.

Packing and Shipping:

Product Packaging:

The FM 200 Piping Extinguishing System will be securely packed in a sturdy cardboard box to ensure protection of the product during transportation. The box will have the product name, description, weight, and dimensions clearly labeled on the outside for easy identification.

Shipping:

The product will be shipped via a reliable shipping service to ensure prompt delivery. The shipping cost will be calculated based on the destination and weight of the package. The estimated delivery time will be provided to the customer upon shipment of the product. A tracking number will also be provided to enable the customer to track the progress of their shipment online.
