

## Piping Network FM200 Fire Extinguisher Red Cylinder 70L For Data Centres Etc

Our Product Introduction

for more products please visit us on [firefm200.com](http://firefm200.com)

### Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: RUIGANG
- Certification: CE/CCC/ISO/CMA/CAL/CNAS
- Model Number: QMQ4.2/70N-RG
- Minimum Order Quantity: 1 set
- Price: negotiation
- Packaging Details: wooden outer box with bubble bag or paper
- Delivery Time: 10~15 working days
- Payment Terms: T/T, L/C
- Supply Ability: 3000 sets per week

Because we are dedicated,  
so we are professional.

### Product Specification

- Polyt Cylinder: 4L Or 8L
- Working Pressure: 4.2MPa
- Piping Material: Steel
- Type: Gaseous Fire Suppression System
- Cylinder Material: Steel
- Starting Mode: Automatic, Electrical Manual, Mechanical Emergency Manual
- Cylinder Volume: 70L
- Nozzle Discharge Time: 10 Seconds
- Maximum Working Pressure: 8.0Mpa
- Minimum Working Pressure: 4.6Mpa
- Working Temperature: 0°C- 50°C

## Product Description

### Product Description:

The system is designed to be equipped with a piping network that is strategically installed throughout the data center. This network of pipes ensures that the FM 200 gas is delivered quickly and effectively to the areas where the fire is most likely to occur.

One of the key features of the FM 200 Piping Extinguishing System is its nozzle discharge time. With a nozzle discharge time of just 10 seconds, the system can quickly suppress the fire before it can cause any significant damage to the critical equipment in the data center. The FM 200 Piping Extinguishing System is designed to be activated automatically in the event of a fire. This means that the system will be triggered as soon as the fire is detected, without the need for any manual intervention. This feature ensures that the data center is always protected, even when there is no one present to initiate the system.

In addition to the automatic activation mode, the FM 200 Piping Extinguishing System also features an electrical manual starting mode and a mechanical emergency manual starting mode. These modes provide additional protection in the event of a power outage or other emergency situation.

In summary, the FM 200 Piping Extinguishing System is an ideal fire suppression system for data centers. Its gaseous extinguishing concentration, nozzle discharge time, and automatic activation mode make it an effective and reliable solution for protecting critical equipment from fire. With the added benefits of electrical and mechanical emergency manual starting modes, the FM 200 Piping Extinguishing System is a comprehensive solution that provides complete peace of mind.

**Because we are dedicated,  
so we are professional.**

### Applications:

The FM 200 fire fighting system is suitable for many application occasions, such as data centers, archives, museums, telecommunications centers, and power distribution rooms. It is especially useful in areas where water cannot be used to put out fires, or where water will cause significant damage to equipment or sensitive materials.

The RUIGANG QMQ4.2/70N-RG FM200 piping extinguishing system is made of high-quality steel and can withstand a working pressure of 4.2MPa. It is powered by DC24V/1.5A power supply and is activated automatically when a fire is detected. The supply ability of this product is up to 3000 sets per week, and the delivery time is usually 10~15 working days.

This FM200 extinguisher is packed with first polyfoam and then wooden cases. If customers require a pallet for products, we will make products a pallet. With its efficient and effective fire-fighting capability, the RUIGANG QMQ4.2/70N-RG FM200 piping extinguishing system is an ideal choice for data center fire suppression systems, and many other scenarios where quick and reliable fire suppression is essential.

For payment, we accept L/C and T/T. Contact us now to place your order and secure your premises from fire hazards with the RUIGANG QMQ4.2/70N-RG FM200 piping extinguishing system.

### Support and Services:

The FM 200 Piping Extinguishing System is a fire suppression system designed to protect high-value assets and sensitive equipment from fire damage. The system uses FM 200 gas to quickly extinguish fires without leaving any residue or damaging the protected equipment.

Our technical support team is available to assist with installation, maintenance, and troubleshooting of the FM 200 Piping Extinguishing System. We offer comprehensive services to ensure that your system is installed and functioning correctly, including:

Site surveys to determine the best placement of the system

Installation and commissioning of the system

Training for personnel on system operation and maintenance

Regular maintenance and inspection of the system to ensure proper functioning

24/7 technical support to address any issues that may arise

Our team of experienced engineers and technicians are dedicated to providing the highest level of service and support for our clients. Contact us for more information on our FM 200 Piping Extinguishing System and technical support services.

### **Packing and Shipping:**

Product Packaging:

FM 200 Piping Extinguishing System unit

Installation and Operation Manual

Warning and Safety Labels

Mounting Brackets and Hardware

Shipping:

Mode of transport: Land / Sea
