

Top Marine CO2 Fire Extinguishing Systems for Vessel Fire Protection

Our Product Introduction

Basic Information

- Brand Name: RUIGANG
- Certification: CCS,BV
- Model Number: RG8/10/12/20/40/68
- Minimum Order Quantity: 1set
- Price: Negotiable
- Packaging Details: Plywood Outer Box With Bubble Bag Or Paper
- Delivery Time: 15~20 Worke Days
- Payment Terms: T/T,L/C
- Supply Ability: 500 Sets/ Month

Product Specification

- Cylinder Material: Stainless Steel
- Agent: Carbon Dioxide CO2
- Working Pressure: 14.1 MPa
- Propellant Gas: N2
- Warranty: 1 Year
- Diaphragm Burst Pressure: 18.6±1MPa
- Color: Red
- Actuating Method: Pneumatic,manual
- Highlight: Marine CO2 Fire Extinguishing Systems

Product Description

Product Description:

The Marine Fire Extinguishing System is an essential component of marine fire safety equipment, providing reliable protection against fires on vessels. This advanced system offers effective Marine Fire Extinguishing Solutions for various types of marine vessels, ensuring the safety of crew members and preventing potential disasters at sea.

One of the key features of this system is its versatile actuating methods, which include pneumatic and manual options. This flexibility allows for quick and efficient activation of the extinguishing system in case of a fire emergency, ensuring prompt response and containment of the situation.

The Marine Fire Extinguishing System operates at a working pressure of 14.1 MPa, providing the necessary force to discharge the fire suppressant agent effectively. With a discharge delay time of 20~40 seconds, this system delivers rapid response capabilities to combat fires swiftly and minimize damage to the vessel.

Designed for reliability and safety, the system is built to withstand high pressure environments, with a diaphragm burst pressure of 18.6 ± 1 MPa. This robust construction ensures the integrity of the system during operation, guaranteeing consistent performance when needed most.

Utilizing N₂ as the propellant gas, the Marine Fire Extinguishing System offers a dependable and environmentally friendly solution for fire suppression on marine vessels. N₂ is a non-toxic and non-corrosive gas that is safe for use in enclosed spaces, making it ideal for marine applications where crew safety is paramount.

Whether installed in cargo ships, oil tankers, passenger vessels, or other marine platforms, the Marine Fire Extinguishing System provides reliable protection against fires of various sizes and types. Its efficient actuating methods, high working pressure, quick discharge delay time, and durable construction make it a trusted choice for vessel CO₂ fire extinguisher systems.

In conclusion, the Marine Fire Extinguishing System is a vital component of marine fire safety equipment, offering effective and reliable fire protection for a wide range of marine vessels. With its advanced features, including pneumatic and manual actuating methods, high working pressure, quick discharge delay time, and robust construction, this system ensures the safety of crew members and the security of the vessel against potential fire hazards. Trust in the Marine Fire Extinguishing System for superior marine fire extinguishing solutions and peace of mind at sea.

Applications:

RUIGANG Marine Fire Extinguishing System, model numbers RG8/10/12/20/40/68, is a crucial component for ensuring Marine Fire Safety Systems on vessels. This CO₂ Fire Protection for Vessels is designed to provide effective fire suppression in the demanding environment of the marine industry.

Originating from Guangzhou, Guangdong, China, this system is certified by CCS and BV, meeting the highest standards of quality and safety. The minimum order quantity is 1 set, with a negotiable price to accommodate different budget requirements.

Each Marine Fire Extinguishing System is carefully packaged in a plywood outer box with bubble bag or paper for secure transportation. The delivery time is estimated at 15 to 20 working days, ensuring prompt availability when needed. Payment terms include T/T and L/C, offering flexibility for customers.

With a supply ability of 500 sets per month, RUIGANG ensures that the Marine Fire Extinguishing System is readily accessible to meet

the demands of the marine industry. The cylinder material is stainless steel, providing durability and reliability in challenging marine conditions.

The actuating method can be either pneumatic or manual, allowing for versatile deployment based on specific requirements. The system operates at a nominal pressure of 14.1MPa, delivering efficient fire suppression capabilities.

Available in a striking red color, the Marine Fire Extinguishing System comes in various capacities including 8L, 10L, 12L, 20L, 40L, and 68L. This range of options ensures that vessels of different sizes can be effectively protected against fire hazards.

Whether for commercial shipping, naval vessels, or offshore platforms, the RUIGANG Marine Fire Extinguishing System offers reliable Fire Suppression System for Marine Industry applications. Trust in RUIGANG for top-quality fire safety solutions at sea.

Customization:

Product Customization Services for the RUIGANG Marine Fire Extinguishing System:

Brand Name: RUIGANG

Model Number: RG8/10/12/20/40/68

Place Of Origin: Guangzhou, Guangdong, China

Certification: CCS, BV

Minimum Order Quantity: 1 set

Price: Negotiable

Packaging Details: Plywood Outer Box With Bubble Bag Or Paper

Delivery Time: 15~20 Working Days

Payment Terms: T/T, L/C

Supply Ability: 500 Sets/ Month

Cylinder Material: Stainless Steel

Actuating Method: Pneumatic, manual

Warranty: 1 Year

Working Pressure: 14.1 MPa

Nominal Pressure: 14.1 MPa

Keywords: Fire Suppression System for Marine Industry, CO2 Fire Safety for Ships, Marine Fire Prevention Solutions

Packing and Shipping:

Product Name: The Marine Fire Extinguishing System

Description: A reliable fire extinguishing system designed for marine use to quickly and effectively put out fires on boats and ships.

Package Contents:

Marine Fire Extinguishing System unit

Installation instructions

Warranty information

Shipping Information:

Shipping Method: Standard Shipping

Estimated Delivery Time: 5-7 business days

Shipping Cost: Calculated at checkout

FAQ:

Q: What is the brand name of the Marine Fire Extinguishing System?

A: The brand name is RUIGANG.

Q: What are the available model numbers for the Marine Fire Extinguishing System?

A: The available model numbers are RG8, RG10, RG12, RG20, RG40, and RG68.

Q: Where is the Marine Fire Extinguishing System manufactured?

A: The system is manufactured in Guangzhou, Guangdong, China.

Q: What certifications does the Marine Fire Extinguishing System hold?

A: The system is certified by CCS (China Classification Society) and BV (Bureau Veritas).

Q: What is the minimum order quantity for the Marine Fire Extinguishing System?

A: The minimum order quantity is 1 set.
